(b)  $Fe(s) + ZnSO_4(aq) \rightarrow FeSO_4(aq) + Zn(s)$   
(c)  $Zn(s) + FeSO_4(aq) \rightarrow ZnSO_4(aq) + Fe(s)$
9. What are homologous series of carbon compounds? Write the molecular formula of two consecutive members of homologous series of aldehydes. State which part of these compounds determines their (i) physical and (ii) chemical properties.

10. Describe in brief the function of kidneys, ureters, urinary bladder and urethra.
11. Which part of the brain controls involuntary actions? Write the function of any two regions of it.
12. What is meant by pollination? Name and differentiate between the two modes of pollination in flowering plants.
13. State the laws of refraction of light. If the speed of light in vacuum is  $3 \times 10^8$  m/s, find the absolute refractive index of a medium in which light travels with a speed of  $1.4 \times 10^8$  m/s.
14. An object placed on a metre scale at 8 cm mark was focussed on a white screen placed at 92 cm mark, using a converging lens placed on the scale at 50 cm mark.
  - (i) Find the focal length of converging lens.
  - (ii) Find the position of the image formed if the object is shifted towards the lens at a position of 29.0 cm.
  - (iii) State the nature of the image formed if the object is further shifted towards the lens.
15. Study the circuit shown:

A current of 0.6 A is shown by ammeter in the circuit when the key K1 is closed. Find the resistance of the lamp L. What change in current flowing through the 5 Ω resistor and potential difference across the lamp will take place, if the key K2 is also closed. Give reason for your answer.

16. A metal nitrate 'A' on heating gives yellowish brown coloured metal oxide along with brown gas 'B' and a colourless gas 'C'. Aqueous solution of 'A' on reaction with potassium iodide forms a yellow precipitate of compound 'D'. Identify 'A, B, C, D'. Also identify the types of both the reactions. Metal present in 'A' is used in alloy which is used for soldering purposes.
17. (a) Differentiate between roasting and calcination. Explain the two with the help of suitable chemical equations. How is zinc extracted from its ore?
