## General Instructions:

(i). All questions are compulsory.
(ii). This question paper contains 20 questions divided into five Sections $\mathrm{A}, \mathrm{B}, \mathrm{C}, \mathrm{D}$ and E .
(iii). Section A comprises of $\mathbf{1 0}$ MCQs of $\mathbf{1}$ mark each. Section B comprises of 4 questions of $\mathbf{2}$ marks each. Section C comprises of 3 questions of $\mathbf{3}$ marks each. Section $\mathbf{D}$ comprises of 1 question of 5 marks each and Section E comprises of 2 Case Study Based Questions of 4 marks each.
(iv). There is no overall choice.
(v). Use of Calculators is not permitted

## SECTION - A

## Questions 1 to 10 carry 1 mark each.

1. For the following distribution:

| Class | $0-5$ | $5-10$ | $10-15$ | $15-20$ | $20-25$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency | 10 | 15 | 12 | 20 | 9 |

the sum of lower limits of the median class and modal class is
(a) 15
(b) 25
(c) 30
(d) 35

Ans: (b) 25
Since, $N=66$, then $\frac{N}{2}=33$
and cumulative frequency greater than or equal to 33
lies in class $10-15$
So, median class is $10-15$
$\therefore$ Lower limit of median class is 10
and highest frequency is 20 lie in class $15-20$
So, modal class is $15-20$.
$\therefore$ Lower limit of modal class is 15 .

| Class | Frequency (f) | c.f. |
| :---: | :---: | :---: |
| $0-5$ | 10 | 10 |
| $5-10$ | 15 | 25 |
| $10-15$ | 12 | 37 |
| $15-20$ | 20 | 57 |
| $20-25$ | 9 | 66 |
|  | $N=66$ |  |

Hence, sum of lower limits of the median and modal class is $10+15=25$.
2. If the difference of Mode and Median of a data is 24 , then the difference of median and mean is
(a) 8
(b) 12
(c) 24
(d) 36

Ans: (b) 12
mode - median $=24$ (given)
$\therefore$ mode $=24+$ median
Since, mode $=3$ median -2 mean [By empirical relation]
$\therefore 24+$ median $=3$ median -2 mean
$\Rightarrow 2$ median -2 mean $=24$
$\Rightarrow$ median - mean $=12$
3. The mean and mode of a frequency distribution are 28 and 16 respectively. The median is
(a) 22
(b) 23.5
(c) 24
(d) 24.5

Ans: (c) 24
We know that, Mode $=3$ Median -2 Mean
$\Rightarrow 3$ Median $=$ Mode +2 Mean
$\Rightarrow 3$ Median $=16+2 \times 28 \Rightarrow$ Median $=72 / 3=24$
4. The runs scored by a batsman in 35 different matches are given below:

| Runs Scored | $0-15$ | $15-30$ | $30-45$ | $45-60$ | $60-75$ | $75-90$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency | 5 | 7 | 4 | 8 | 8 | 3 |

The lower limit of the median class is
(a) 15
(b) 30
(c) 45
(d) 60

Ans: (c) 45

| Runs Scored | $0-15$ | $15-30$ | $30-45$ | $45-60$ | $60-75$ | $75-90$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency | 5 | 7 | 4 | 8 | 8 | 3 |
| $\boldsymbol{c} \boldsymbol{f}$ | 5 | 12 | 16 | 24 | 32 | 35 |

Here, $\mathrm{n}=35 \Rightarrow \mathrm{n} / 2=17.5$
Median class is $45-60$
Hence, lower limit is 45
5. The median class of the following data is:

| Marks | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ | $50-60$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of students | 8 | 10 | 12 | 22 | 30 | 18 |

(a) $20-30$
(b) $30-40$
(c) $40-50$
(d) $50-60$

Ans: (b) 30-40

| Marks | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ | $50-60$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of students | 8 | 10 | 12 | 22 | 30 | 18 |
| cf | 8 | 18 | 30 | 52 | 82 | 100 |

Here, $n=100$ So, $\frac{n}{2}=50$
The cumulative frequency, just greater than 50 , is 52 which belongs to class $30-40$.
So, the median class is $30-40$.
6. For the following distribution:

| Marks | Below | Below | Below | Below | Below | Below |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 10 | 20 | 30 | 40 | 50 | 60 |
| No. of Students | 3 | 12 | 27 | 57 | 75 | 80 |

the modal class is
(a) 10-20
(b) $20-30$
(c) $30-40$
(d) $50-60$

Ans: (c) 30-40

| Marks | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ | $50-60$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of Students | 3 | 9 | 15 | 30 | 18 | 5 |

Highest frequency is 30 which belong to $30-40$. Hence, Modal class is $30-40$
7. For the following distribution:

| Class | $0-5$ | $6-11$ | $12-17$ | $18-23$ | $24-29$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency | 13 | 10 | 15 | 8 | 11 |

the upper limit of the median class is
(a) 18.5
(b) 20.5
(c) 25.5
(d) 17.5

Ans:

| Class | Frequency | Cf |
| :---: | :---: | :---: |
| $-0.5-5.5$ | 13 | 13 |
| $5.5-11.5$ | 10 | 23 |
| $11.5-17.5$ | 15 | 38 |
| $17.5-23.5$ | 8 | 46 |
| $23.5-29.5$ | 11 | 57 |

Here, $n=57$ So, $\frac{n}{2}=28.5$
The cumulative frequency, just greater than 28.5, is 38 which belongs to class $11.5-17.5$.
So, the median class is $11.5-17.5$ Its upper limit is 17.5
8. If the mean of the following distribution is 2.6 , then the value of $y$ is

| Variable (x) | 1 | 2 | 3 | 4 | 5 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency | 4 | 5 | $y$ | 1 | 2 |

(a) 3
(b) 8
(c) 13
(d) 24

Ans: (b) 8

| Variable (x) | 1 | 2 | 3 | 4 | 5 | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency (f) | 4 | 5 | y | 1 | 2 | $\mathrm{y}+12$ |
| $\mathbf{f x}$ | 4 | 10 | 3 y | 4 | 10 | $3 \mathrm{y}+28$ |

Here, $\sum \mathrm{f}=\mathrm{y}+12$ and $\sum \mathrm{fx}=3 \mathrm{y}+28$
Mean, $\bar{x}=\frac{\sum f x}{\sum f} \Rightarrow 2.6=\frac{3 y+28}{y+12} \Rightarrow 3 y+28=2.6 y+31.2$
$\Rightarrow 0.4 y=3.2 \Rightarrow y=8$
In the following questions 9 and 10 , a statement of assertion (A) is followed by a statement of reason ( R ). Mark the correct choice as:
(a) Both assertion (A) and reason (R) are true and reason (R) is the correct explanation of assertion (A).
(b) Both assertion (A) and reason (R) are true but reason (R) is not the correct explanation of assertion (A).
(c) Assertion (A) is true but reason (R) is false.
(d) Assertion (A) is false but reason (R) is true.
9. Assertion (A): The arithmetic mean of the following given frequency distribution table is 13.81 .

| Marks | $2.5-5.5$ | $5.5-8.5$ | $8.5-11.5$ | $11.5-14.5$ | $14.5-17.5$ | $17.5-20.5$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of Students | 7 | 10 | 15 | 20 | 25 | 30 |

Reason (R): Mean $=\sum \mathrm{fx} / \sum \mathrm{f}$
Ans: (a) Both assertion (A) and reason (R) are true and reason (R) is the correct explanation of assertion (A).

| Marks | $2.5-5.5$ | $5.5-8.5$ | $8.5-11.5$ | $11.5-14.5$ | $14.5-17.5$ | $17.5-20.5$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of Students | 7 | 10 | 15 | 20 | 25 | 30 |
| Class mark ' $\mathbf{x}$ ' | 4 | 7 | 10 | 13 | 16 | 19 |
| Fx | 28 | 70 | 150 | 260 | 400 | 570 |

Here, $\sum \mathrm{fx}=1478, \sum \mathrm{f}=107$
Mean $=\sum \mathrm{fx} / \sum \mathrm{f}=1478 / 107=13.81$
10. Assertion (A): If the value of mode and mean is 60 and 66 respectively, then the value of median is 64.

Reason $(\mathbf{R})$ : Median $=($ mode +2 mean $) / 2$
Ans: (c) Assertion (A) is true but reason (R) is false.
Median $=\frac{1}{3}(\bmod e+2$ mean $)=\frac{1}{3}[60+2(66)]=\frac{1}{3} \times 192=64$

## SECTION - B

## Questions 11 to 14 carry 2 marks each.

11. Calculate mode of the following data:

| Marks | $0-20$ | $20-40$ | $40-60$ | $60-80$ | $80-100$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| No. of Students | 5 | 10 | 12 | 6 | 3 |

Ans: Since the maximum frequency is 12 which belongs to $40-60$, therefore modal class is 40 60
Here, $l=40, f_{0}=10, f_{1}=12, f_{2}=6, h=20$
Mode $=l+\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}} \times h \Rightarrow$ Mode $=40+\frac{12-10}{24-10-6} \times 20=40+\frac{2}{8} \times 20=40+5=45$
12. Calculate median marks of the following data:

| Marks | $0-10$ | $10-20$ | $20-30$ | $30-40$ | $40-50$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| No. of Students | 2 | 12 | 22 | 8 | 6 |

Ans:

| Classes | Number of students | c.f. |
| ---: | :---: | :---: |
| $0-10$ | 2 | 2 |
| $10-20$ | 12 | 14 |
| $20-30$ | 22 | 36 |
| $30-40$ | 8 | 44 |
| $40-50$ | 6 | 50 |

$n=50, \frac{n}{2}=\frac{50}{2}=25$, Median Class $=20-30$
$I=20, f=22$, c.f. $=14, h=10$
Median $=l+\frac{\left(\frac{n}{2}-c . f .\right)}{f} \times h=20+\frac{(25-14)}{22} \times 10=20+\frac{11}{22} \times 10=20+5=25$
13. Calculate mode of the following data:

| Marks | $0-6$ | $6-12$ | $12-18$ | $18-24$ | $24-30$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| No. of Students | 7 | 5 | 10 | 12 | 6 |

Ans:
Modal class $=18-24$
$\therefore p=18, f_{0}=10, f_{1}=12, f_{2}=6, h=6$
$\therefore$ Mode $=\left(\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}}\right) \times h=18+\frac{12-10}{24-10-6} \times 6=18+\frac{12}{8}=18+1.5=19.5$
14. Find the mean of the following distribution:

| Class | $3-5$ | $5-7$ | $7-9$ | $9-11$ | $11-13$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency | 5 | 10 | 10 | 7 | 8 |

Ans:

| Class | $3-5$ | $5-7$ | $7-9$ | $9-11$ | $11-13$ | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Frequency 'f' | 5 | 10 | 10 | 7 | 8 | 40 |
| Class mark 'x' | 4 | 6 | 8 | 10 | 12 |  |
| $\mathbf{f x}$ | 20 | 60 | 80 | 70 | 96 | 326 |

Mean, $\bar{x}=\frac{\sum f x}{\sum f}=\frac{326}{40}=8.15$

## SECTION - C

## Questions 15 to 17 carry 3 marks each.

15. Daily wages of 110 workers, obtained in a survey, are tabulated below:

| Daily Wages (in Rs. ) | $100-120$ | $120-140$ | $140-160$ | $160-180$ | $180-200$ | $200-220$ | $220-240$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number of Workers | 10 | 15 | 20 | 22 | 18 | 12 | 13 |

Compute the mean daily wages and modal daily wages of these workers.
Ans:

| Daily Wages <br> $($ in $₹)$ | Number of <br> Workers $\left(f_{i}\right)$ | $x_{i}$ | $u_{i}$ | $f_{i} u_{i}$ |
| :---: | :---: | :---: | :---: | :---: |
| $100-120$ | 10 | 110 | -3 | -30 |
| $120-140$ | 15 | 130 | -2 | -30 |
| $140-160$ | 20 | 150 | -1 | -20 |
| $160-180$ | 22 | 170 | 0 | 0 |
| $180-200$ | 18 | 190 | 1 | 18 |
| $200-220$ | 12 | 210 | 2 | 24 |
| $220-240$ | 13 | 230 | 3 | 39 |
| Total | 110 |  |  | 1 |

Mean daily wages

$$
\begin{aligned}
& =170+\frac{1}{110} \times 20 \\
& =₹ 170.19 \text { (approx.) }
\end{aligned}
$$

Mode $=160+\frac{22-20}{44-20-18} \times 20$
$=₹ 166.67$ (approx.)
16. The table below shows the salaries of 280 persons:

| Salary <br> (in thousand Rs.) | $5-10$ | $10-15$ | $15-20$ | $20-25$ | $25-30$ | $30-35$ | $35-40$ | $40-45$ | $45-50$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of persons | 49 | 133 | 63 | 15 | 6 | 7 | 4 | 2 | 1 |

Calculate the median salary of the data.
Ans:

| Salary <br> (in thousand Rs.) | $5-10$ | $10-15$ | $15-20$ | $20-25$ | $25-30$ | $30-35$ | $35-40$ | $40-45$ | $45-50$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of persons | 49 | 133 | 63 | 15 | 6 | 7 | 4 | 2 | 1 |
| $\boldsymbol{c f}$ | 49 | 182 | 245 | 260 | 266 | 273 | 277 | 279 | 280 |

Here, $\mathrm{n}=280 \Rightarrow \mathrm{n} / 2=140$
$\Rightarrow$ Median class is $10-15$
$l=10, \mathrm{cf}=49, \mathrm{f}=133, \mathrm{~h}=5$
Median $=l+\left(\frac{\frac{n}{2}-c f}{f}\right) \times h$
Median $=10+\left(\frac{140-49}{133}\right) \times 5=10+\frac{91 \times 5}{133}=10+\frac{455}{133}=10+3.421=13.42$
Hence, median salary is Rs. 13.42 (in thousand)
17. The arithmetic mean of the following frequency distribution is 50 . Find the value of p .

| Class | $0-20$ | $20-40$ | $40-60$ | $60-80$ | $80-100$ |
| :---: | :---: | :---: | :---: | :---: | :---: |
| frequency | 17 | $p$ | 32 | 24 | 19 |

Ans:

| Class | $\boldsymbol{x}_{\boldsymbol{i}}$ | Frequency <br> $\boldsymbol{f}_{\boldsymbol{i}}$ | $\boldsymbol{f}_{\boldsymbol{i}} \boldsymbol{x}_{\boldsymbol{i}}$ |
| :---: | :---: | :---: | :---: |
| $0-20$ | 10 | 17 | 170 |
| $20-40$ | 30 | $p$ | $30 p$ |
| $40-60$ | 50 | 32 | 1600 |
| $60-80$ | 70 | 24 | 1680 |
| $80-100$ | 90 | 19 | 1710 |
| Total |  | $\Sigma f_{i}=92+p$ | $\Sigma f_{i} x_{i}=5160+30 p$ |

## SECTION - D

## Questions 18 carry 5 marks.

18. The median of the following data is 868 . Find the values of $x$ and $y$, if the total frequency is 100

| Class | Frequency |
| :---: | :---: |
| $800-820$ | 7 |
| $820-840$ | 14 |
| $840-860$ | x |
| $860-880$ | 25 |
| $880-900$ | y |
| $900-920$ | 10 |
| $920-940$ | 5 |

## Ans:

| Class | Frequency | Frequency |
| :---: | :---: | :---: |
| $800-820$ | 7 | 7 |
| $820-840$ | 14 | 21 |
| $840-860$ | x | $\mathrm{x}+21$ |
| $860-880$ | 25 | $\mathrm{x}+46$ |
| $880-900$ | y | $\mathrm{x}+\mathrm{y}+46$ |
| $900-920$ | 10 | $\mathrm{x}+\mathrm{y}+56$ |
| $920-940$ | 5 | $\mathrm{x}+\mathrm{y}+61$ |

From table, we have $x+y+61=100 \Rightarrow x+y=100-61 \Rightarrow x+y=39$
Here, median $=868$, therefore median class is $860-880$
So, $l=860, \mathrm{cf}=\mathrm{x}+21, \mathrm{f}=25, \mathrm{~h}=20, \mathrm{n} / 2=50$
Now, Median $=l+\left(\frac{\frac{n}{2}-c f}{f} \times h\right) \Rightarrow 868=860+\left(\frac{50-(x+21)}{25} \times 20\right)$
$\Rightarrow 868-860=\left(\frac{50-x-21)}{5} \times 4\right) \Rightarrow 8=\frac{29-x}{5} \times 4$
$\Rightarrow 40=(29-x) 4 \Rightarrow 29-x=10 \Rightarrow x=29-10=19$
$\Rightarrow y=39-19=20$

## OR

The distribution below gives the makes of 100 students of a class, if the median makes are 24 , find the frequencies $f_{1}$ and $f_{2}$

| Marks | $0-5$ | $5-10$ | $10-15$ | $15-20$ | $20-25$ | $25-30$ | $30-35$ | $35-40$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of students | 4 | 6 | 10 | $f_{1}$ | 25 | $f_{2}$ | 18 | 5 |

Ans:

| Class | Frequency | cf |
| :--- | :--- | :--- |
| $0-5$ | 4 | 4 |
| $5-10$ | 6 | 10 |
| $10-15$ | 10 | 20 |
| $15-20$ | $\mathrm{f}_{1}$ | $20+\mathrm{f}_{1}$ |
| $20-25$ | 25 | $45+\mathrm{f}_{1}$ |
| $25-30$ | $\mathrm{f}_{2}$ | $45+\mathrm{f}_{1}+\mathrm{f}_{2}$ |
| $30-35$ | 18 | $63+\mathrm{f}_{1}+\mathrm{f}_{2}$ |
| $35-40$ | 5 | $68+\mathrm{f}_{1}+\mathrm{f}_{2}$ |

Now, Median $=24$ (Given)
So, median class $=20-25$
For this class,
$\mathrm{I}=20 . \mathrm{h}=5, \mathrm{n} / 2=50, \mathrm{cf}=20+f_{1}, f=25$

We know, Median $=l+\left(\frac{\frac{n}{2}-c f}{f} \times h\right)$
$\Rightarrow 24=20+\frac{50-\left(20+f_{1}\right)}{25} \times 5 \Rightarrow 4=\frac{30-f_{1}}{5} \Rightarrow 30-f_{1}=20 \Rightarrow f_{1}=10$
Also, sum of frequencies $=100$
$\Rightarrow 68+f_{1}+f_{2}=100 \quad \Rightarrow f_{1}+f_{2}=32 \Rightarrow 10+f_{2}=32 \Rightarrow f_{2}=22$
$\therefore f_{1}=10, f_{2}=22$.

## SECTION - E (Case Study Based Questions) Questions 19 to 20 carry 4 marks each.

19. The COVID-19 pandemic, also known as the coronavirus pandemic, is an ongoing pandemic of coronavirus disease 2019 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). It was first identified in December 2019 in Wuhan, China.
During survey, the ages of 80 patients infected by COVID and admitted in the one of the City hospital were recorded and the collected data is represented in the less than cumulative frequency distribution table.

| Age(in year) | Below 15 | Below 25 | Below 35 | Below 45 | Below 55 | Below 65 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| No. of patients | 6 | 17 | 38 | 61 | 75 | 80 |

Based on the above information, answer the following questions.
(a) Find the modal class interval. [1]
(b) Find the median class interval [1]
(c) Find the modal age of the patients admitted in the hospital. [2]

OR
(c) Find the median age of the patients admitted in the hospital. [2]

Ans: (a) Since the highest frequency is 23 which belongs to $35-45$.
Therefore, modal class is $35-45$.

| Age(in yrs) | No. of patients | cf |
| :---: | :---: | :---: |
| $5-15$ | 6 | 6 |
| $15-25$ | 11 | 17 |
| $25-35$ | 21 | 38 |
| $35-45$ | 23 | 61 |
| $45-55$ | 14 | 75 |
| $55-65$ | 5 | 80 |

(b) Here, $\mathrm{n}=80 \Rightarrow \mathrm{n} / 2=80 / 2=40$ which lies in $35-45$

Therefore, medial class is $35-45$.
(c) Here, $l=35, f_{0}=21, f_{1}=23, f_{2}=14, h=10$

Mode $=l+\frac{f_{1}-f_{0}}{2 f_{1}-f_{0}-f_{2}} \times h \Rightarrow$ Mode $=35+\frac{23-21}{46-21-14} \times 10=35+\frac{2}{11} \times 10=36.8$

## OR

(c) Here, $\mathrm{n}=80 \Rightarrow \mathrm{n} / 2=40$, therefore median class is $35-45$

So, $l=35, \mathrm{cf}=38, \mathrm{f}=23, \mathrm{~h}=10$
Now, Median $=l+\left(\frac{\frac{n}{2}-c f}{f} \times h\right) \Rightarrow$ Median $=35+\left(\frac{40-38}{23} \times 10\right)$
$\Rightarrow$ Median $=35+\left(\frac{20}{23}\right)=35+0.87=35.87$
20. Overweight and obesity may increase the risk of many health problems, including diabetes, heart disease, and certain cancers. The basic reason behind is the laziness, eating more junk foods and less physical exercise. The school management give instruction to the school to collect the weight data of each student.

During medical check of 35 students from Class X- A, there weight was recorded as follows:

| Weight (in kg) | No. of Students |
| :---: | :---: |
| Less than 38 | 0 |
| Less than 40 | 3 |
| Less than 42 | 5 |
| Less than 44 | 9 |
| Less than 46 | 14 |
| Less than 48 | 28 |
| Less than 50 | 32 |
| Less than 52 | 35 |

(a) Find the median class of the given data. (1)
(b) Find the modal class of the given data. (1)
(c) Calculate the median weight of the given data. (2)

OR
(c) Find the mean of the given data. (2)

Ans: (a)

| Weight (in kg) | No. of Students | cf |
| :---: | :---: | :---: |
| Below 38 | 0 | 0 |
| $38-40$ | 3 | 3 |
| $40-42$ | 2 | 5 |
| $42-44$ | 4 | 9 |
| $44-46$ | 5 | 14 |
| $46-48$ | 14 | 28 |
| $48-50$ | 4 | 32 |
| $50-52$ | 3 | 35 |

Here, $n=35$ So, $\frac{n}{2}=17.5$
The cumulative frequency, just greater than 17.5 , is 28 which belongs to class $46-48$. So, the median class is $46-48$.
(b) The highest frequency in the given data is 14 , which belongs to class 46-48.

So, modal classis 46-48.
(c) Here, $l=46, \mathrm{cf}=14, \mathrm{f}=14, \mathrm{~h}=6$

Now, Median $=l+\left(\frac{\frac{n}{2}-c f}{f} \times h\right) \Rightarrow$ Median $=46+\left(\frac{17.5-14}{14} \times 2\right)$
$\Rightarrow$ Median $=46+\left(\frac{3.5}{14} \times 2\right)=46+0.5=46.5$
OR
(c)

| Weight (in kg) | Class mark ' $\mathbf{x}{ }^{\prime}$ | $\mathbf{\prime} \mathbf{f}^{\prime}$ | $\mathbf{f x}$ |
| :---: | :---: | :---: | :---: |
| $38-40$ | 39 | 3 | 117 |
| $40-42$ | 41 | 2 | 82 |
| $42-44$ | 43 | 4 | 172 |
| $44-46$ | 45 | 5 | 225 |
| $46-48$ | 47 | 14 | 658 |
| $48-50$ | 49 | 4 | 196 |
| $50-52$ | 51 | 3 | 153 |
| Total |  | $\mathbf{3 5}$ | $\mathbf{1 6 0 3}$ |

Mean, $\bar{x}=\frac{\sum f x}{\sum f}=\frac{1603}{35}=45.8$
